"Chicken epidermal growth factor (EGF) receptor: cDNA cexpression in mouse cells, and differential binding of transforming growth factor alpha.";
Mol. Cell. Biol. 8:1970-1978(1988).

-i- FUNCTION: THE EGF RECEPTOR MEDIATES THE BIOLOGICAL AND ALSO OF TGF-ALPHA, AMPHIREGULIN, HEPARIN-BINDIN VACCINIA VIRUS GROWTH FACTOR (BY SIMILARITY).

-i- CATALYTIC ACTIVITY: ATP + a protein tyrosine = ADP
                                                                                                                                                                                                                                                                                        MEDLINE=88261272; PubMed=3260329;

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                      seq length: 0
